SUMMARY

Senior DevOps and Platform Engineer with 5+ years in DevOps and a decade of software development before it. I design, build and run Kubernetes platforms across development, test and production environments, having managed 30+ clusters on a large fleet of bare-metal and virtual servers, with GitOps delivery, service mesh, observability and security checks built into the pipeline. A background as a Senior Android Developer means I build platforms with the developer's needs in mind. I also teach DevOps bootcamps.

SKILLS

Containers & Orchestration	Kubernetes, Docker, containerd, Helm, Istio Service Mesh, Kubespray, OpenShift
CI/CD & GitOps	Argo CD, GitOps, GitLab CI/CD, Jenkins, Git, Ansible
Observability	Prometheus, Grafana, Alertmanager
DevSecOps	SonarQube, Semgrep, Container Image Scanning, Kubernetes Security, Secrets Management, SSL/TLS
Linux & Networking	Linux Administration, Bash / Shell Scripting, Nginx, HAProxy, DNS, TCP/IP, Load Balancing
Infrastructure & Data	VMware vCenter, Nexus Repository Manager, PostgreSQL, MongoDB
Programming	Python, Bash, YAML, Java, Kotlin, Android SDK
Methodologies	Agile, Scrum

EXPERIENCE

Senior DevOps Engineer	Jun 2025 – Present
Acctech Technology	Full-time · On-site
- Build and maintain multi-master Kubernetes clusters for the development, test and production environments. - Deploy and operate all company applications on Kubernetes through GitOps with Argo CD and Helm. - Operate the PostgreSQL and MongoDB databases behind the company's applications. - Run Istio service mesh for traffic management and service-to-service communication across the platform. - Own platform engineering and DevSecOps work: CI/CD pipelines with SonarQube and Semgrep, container image scanning and secrets management.	
DevOps Consultant & Infrastructure Architect	Sep 2023 – Present
EsfahanAhan	Part-time · Hybrid
- Own the company's entire infrastructure end to end, from architecture design and server provisioning to production. - Build and maintain the CI/CD pipelines and deployment process for all company applications. - Run server maintenance, updates and backup and restore, keeping production services stable and recoverable. - Provide and maintain the development and deployment tooling the development team relies on day to day.	
Senior DevOps Course Author & Workshop Instructor	Feb 2024 – Present
Karocamp	Part-time
Wrote and teach a full DevOps bootcamp: Linux, networking, Bash scripting, Ansible, Docker, Git and GitLab, GitOps, Kubernetes and monitoring.	

Infrastructure Team Lead & DevOps Engineer

Jan 2022 – Jun 2025

Zamin

Full-time · On-site

- Led the infrastructure team and owned project management and the company's entire infrastructure.
- Built and operated dedicated Kubernetes clusters for individual customers, from provisioning with containerd through upgrades and troubleshooting.
- Built CI/CD pipelines with GitLab CI/CD and Jenkins, using Nexus for artifacts and container images.
- Set up monitoring and alerting with Prometheus, Grafana and Alertmanager.
- Managed PostgreSQL and MongoDB databases for production services.
- Administered Linux servers and production traffic with Nginx, HAProxy, DNS and SSL/TLS.

Senior Android Developer

Dec 2017 – Jan 2022

Zamin

Full-time · On-site

- Developed and maintained the company's Android apps in Java and Kotlin, including [Balonet](#).
- Set up CI/CD for Android builds and took on the first DevOps tasks, which led to the move into infrastructure.

EARLIER EXPERIENCE

Co-Founder & Senior Android Developer, Armin: built the Iropeyk app

Sep 2016 – Dec 2017

Android Developer, Arad ITC (part-time)

Feb 2016 – Jun 2016

Android Developer, Freelance

Oct 2013 – Jan 2016

Technical Marketer, NGroup

Jan 2012 – May 2013

Information Technology Expert, SMI Khodro

Jul 2010 – Sep 2011

Android apps shipped (2013–2022): Balonet, Noonet, Iropeyk, Ranandesho, Zabdar, Alchemist, Sib, Arian, Pantonet.

EDUCATION

Bachelor of Information Technology, Sheikh Bahae University

2011 – 2016
